Jofree Alexander Montaño

Full Stack Developer — Backend & Frontend

Bogotá, Colombia | +57 300 7396019 | 1026jota@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with five plus years of experience building fintech products, specializing in Laravel and Vue.js. Experienced integrating banking and payment APIs, including Bancolombia, Davivienda, PSE, and Wompi, and delivering production features across backend and frontend systems. Hands-on with Docker, CI/CD, PostgreSQL, and workflow automation. Systems Administration Engineering graduate focused on reliable services and maintainable code.

WORK EXPERIENCE

Full Stack Developer - SoloVive S.A.S. *March 2020 – Present*

- Designed and integrated financial APIs with banks and payment providers, including Bancolombia, Davivienda, PSE, and Wompi, supporting production transactions.
- Developed backend features with Laravel versions five to eight and frontend features with Vue.js version two, applying SOLID principles in an Agile team.
- Containerized the application with Docker Compose, standardizing development environments and reducing setup time.
- Implemented Bitbucket Pipelines for CI/CD, improving deployment efficiency and quality.
- Built workflow automations with n8n and used Codex to accelerate repetitive engineering tasks.

FEATURED PROJECTS

BokuNoData - Personal Metrics Tracking App | In development

- Bilingual metrics tracking app built with Nuxt four, Vue three, Laravel Gateway and Backend services.
- Implemented Google sign-in with application-issued JWTs, metric creation and listing, and dated value recording through authenticated API flows.
- Uses separate PostgreSQL databases, Docker Compose, and Prometheus/Grafana monitoring.

Masmobile - Phone Balance Top-up Platform

- Built with Laravel ten and Vue three, integrating a SOAP API for phone balance and data package top-ups.
- Includes reporting and user management; hosted on Google Cloud. Processed more than 8,000 top-ups in its first six months.

EDUCATION

Systems Administration Engineering

Universidad Nacional de Colombia, Manizales Campus - 2019

TECHNICAL SKILLS

Backend - PHP (Laravel), Node.js, Python, Java
Frontend - Vue.js, React, jQuery, HTML, CSS, Sass
Data - MySQL, PostgreSQL, MongoDB, Redis
DevOps / Infrastructure - Docker, Docker Compose, Kubernetes, Jenkins, Bitbucket Pipelines, Git/Gitflow, Nginx
Automation & AI Tooling - n8n, Codex
Testing & Monitoring - PHPUnit, Jest, Prometheus, Grafana
Planning / Design - Jira, Figma, Lucidchart

LANGUAGES

Spanish - Native | English - B two (Upper Intermediate)
